SUMMARY

Full-Stack Developer with hands-on experience building and delivering end-to-end web applications across AI platforms, learning systems, OCR tools, and operational business software. Experienced in translating requirements into scalable full-stack solutions spanning frontend implementation, backend development, database design, testing, and release support. Strong command of Laravel, JavaScript/TypeScript, React, Next.js, SQL, and REST APIs, supported by structured problem-solving, cross-functional coordination, rapid adaptation, strong learning agility, and high curiosity for exploring new technologies and practical solutions.

EDUCATION

Telkom University, Bandung **Bandung, Indonesia**

[*Bachelor of Information Systems, School of Industrial Engineering****]*** **2021 – 2025**

Current GPA **: 3.70**

CERTIFICATION BNSP — System Analyst

CORE SKILLS

- **Languages:** PHP, JavaScript, TypeScript, SQL, Java, HTML, CSS
- **Frameworks & Libraries:** Laravel, React, Next.js, Tailwind CSS, Express.js, Fastify, Socket.io, React Hook Form, Zod, Zustand, Framer Motion
- **Databases & Tools:** MySQL, PostgreSQL, MongoDB, Git, GitHub/GitLab, Docker, Postman, Vite, pnpm, VS Code, Figma, Visual Paradigm
- **Engineering & Delivery:** REST API Development, Authentication & Authorization, MVC Architecture, System Analysis, Requirements Translation, Functional Testing, End-to-End Testing (Cypress), UAT, Documentation, Agile/Scrum, Rapid Prototyping, UI/UX/CX Collaboration, Cross-Functional Collaboration, Mentoring, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Full-Stack Developer Associate — Kemnaker MagangHub Program **October 2025 – Present**

MAXY Academy **Jakarta, Indonesia**

- Delivered web applications for internal platforms and confidential client projects, covering new product development and feature enhancement in lean environments.
- Owned end-to-end execution across requirement analysis, solution planning, implementation, testing, refinement, and release support.
- Helped coordinate 16 interns across 5 concurrent projects by assigning tasks, reviewing progress, resolving blockers, and maintaining delivery alignment.
- Built learning modules and mentored interns in coding practices, task breakdown, and delivery standards.

Full-Stack Developer Intern — MBKM (MSIB) **August – December 2024**

Ministry of Education, Culture, Research, and Technology (Kemendikbudristek) **Jakarta, Indonesia**

- Contributed to the SISTER infrastructure module and the re-engineering of SISARPRAS with a cross-functional team.
- Implemented/refined CRUD, joined code reviews, and maintained change logs for smooth handover.
- Coordinated tasks through stand-ups and sprint rituals; ensured clear documentation and progress tracking.

Data Management Intern **June – August 2024**
Telkom Indonesia **Jakarta, Indonesia**

- Entered, updated, validated, and cross-checked large data sets across spreadsheets/databases for consistency.
- Built summaries/reports in Excel/Google Sheets and documented data definitions & update procedures.
- Supported weekly reporting with clean tables and audit notes.

Analysis & Design of Information Systems — Practicum Assistant **February – June 2024**
Telkom University **Bandung, Indonesia**

- Guided students in requirements identification and UML (Use Case, Activity, Sequence, Class, Component, Deployment) using Visual Paradigm.
- Reviewed models/specs, standardized templates, and prepared UAT notes for mini-projects.

Object-Oriented Programming (Java) — Practicum Assistant **September – December 2023**
Telkom University **Bandung, Indonesia**

- Supported core Java OOP concepts (abstraction, encapsulation, inheritance, polymorphism) through labs and code reviews.
- Prepared practice materials/examples and assisted with assessments.

Project-Based Virtual Internship — UI/UX Designer **August – October 2023**
Niagahoster × Rakamin Academy **Online, Indonesia**

- Completed lo-fi → hi-fi prototyping with micro-interactions and developer handoff.
- Redesigned the payment flow as the capstone; presented outcomes and received mentor evaluation.
- Performed basic usability/heuristic reviews to inform iterations.

SELECTED PROJECTS

AI Vero — AI Agent Management Platform | Live Demo

Next.js, TypeScript, Tailwind CSS, MySQL, Gemini API, Groq API

- Built an AI agent management platform with 7 core features covering guided agent creation, knowledge management, complaint handling, analytics, location-based recommendations, and bilingual customer interaction.
- Developed workflows for 3 user roles across 9 main pages, supporting agent provisioning, knowledge ingestion from files and websites, customer conversations, and admin monitoring.
- Integrated structured backend logic and multi-source knowledge ingestion to support scalable AI-driven responses, complaint escalation, and performance tracking.

Quiz Learning Platform | Live Demo

Next.js, TypeScript, Tailwind CSS, Framer Motion, Lucide React, React Markdown

- Built a consolidated interactive learning platform with 7 core features and 15+ pages, centralizing multiple technical modules into a single responsive dashboard.
- Designed modular learning paths for backend, frontend, Git, cybersecurity, UML, and quiz-based practice to support structured self-paced learning.
- Implemented a scalable Next.js interface with interactive content rendering, code highlighting, quiz feedback logic, and reusable architecture for future course expansion.

Virtual Intern LMS | Live Demo

Laravel 12, React 18, Fastify, TypeScript, Socket.io

- Contributed to a multi-service learning management system for virtual internship delivery.
- Worked on core workflows covering authentication, course delivery, live meetings, collaboration, surveys, certification, and document-related processes across a structured learning environment.
- Supported modular development across frontend and backend components, including real-time learning features, engagement tools, and access-controlled platform services.

Premium Auto Care Management System | Live Demo

React 18, Tailwind CSS, FastAPI, MongoDB, JWT Authentication

- Built an integrated auto care management system with 11 core features and 16 main pages, covering customer-facing services and internal outlet operations.
- Developed role-based workflows for 4 user types across POS transactions, membership handling, inventory monitoring, shift control, commission tracking, and operational reporting.
- Implemented service-to-stock logic through bill of materials, multi-payment support, and reporting dashboards to improve operational visibility and streamline daily outlet workflows.

SplitBill OCR | Live Demo

React 19, TypeScript, Node.js, Express.js, Tailwind CSS, MySQL, Gemini API

- Built an OCR-powered split-bill application with 6 core features covering receipt scanning, contact management, automated cost allocation, and WhatsApp-based billing flow.
- Developed the end-to-end workflow from receipt upload and AI parsing to item assignment, summary generation, and shared payment distribution across multiple contacts.
- Focused on reducing manual calculation effort through AI-assisted parsing, local data persistence, and a simple single-page user flow for group payments.

AI Voice CS Platform | Live Demo

React 19, TypeScript, Vite, Tailwind CSS, Gemini API

- Developed an AI-powered customer service prototype supporting chatbot interaction and real-time voice-call testing for faster support scenarios.
- Designed knowledge-base-driven response flows to keep answers relevant to program information, pricing, contact details, and common customer inquiries.
- Built an interactive support interface focused on response accessibility, conversational usability, and rapid service experimentation.
